### Doc M Compliance Options

Inline inward and outward openings  
 Enlarged and ambulant  
 Emergency release indicator

### Structural Details

Integrated head rail  
 Full length channels  
 No patch fixings or cleats  
 Floor mounted integral foot  
 Doweled fittings  
 Tamper proof fixings

**Duo is one range with two very different looks. If you want the traditional curves of a 30mm thick postformed pilaster then choose Duo in the HPL version.**

Alternatively, if curves are not really what you want, then specify Duo in 12mm CGL featuring bull nosed edges and gain the extra benefit of suitability for use in wet areas. Whichever look you choose, each cubicle gains durability from the semi-framed continuous leg, full length channels and headrail. With no patch fittings and three hinges per door, the result is a high performance, great value range ideal for use across a variety of applications.
