Enlarged and ambulant
Emergency release indicator

Structural Details

Integrated head rail
Full length channels
No patch fixings or cleats
Floor mounted integral foot
Doweled fittings
Tamper proof fixings

Duo Plus combines the durability of the Duo range with the enhanced level of privacy afforded by a full height system, resulting in a cost effective option for projects demanding additional privacy.

Available in CGL only, Duo Plus is suitable for a range of both wet and dry environments.

Stability is achieved from the semi framed continuous leg, which is attached to the headrail for additional strength, and continuous channels ensure no sight lines. Three hinges per door also ensure a robust solution for a variety of settings. Configuration options include standard inward opening and disabled outward opening doors set to the front of the pilasters.
