High on performance and versatility, Elan is the ultimate inline glass system designed to meet the uncompromised needs of exclusive applications where the washroom is a vital part of the overall building user's experience.

Elan is the ideal system for exclusive multi-use applications combining washroom, showering and changing in a wet room environment. Architectural in form and scale, Elan is engineered to work in many different configurations and features striking fixings and internal headrail profile, fully compatible with a range of panel options in 10mm back-painted glass.

With attractive anodised corrosion resistant fittings, Elan provides an elegant approach to wetroom design.
